Educational Opportunities for Advancement

**AVERAGE EARNING POTENTIAL:
\$72,900-\$121,600 PER YEAR***

**0-2
YEARS***

**NON-LICENSED
OPERATOR**

- Associate's Degree (NUCP) or
- Four year degree in science or technical areas or
- US Navy experience

**3-6
YEARS***

**REACTOR
OPERATOR**

- Government License

**6-8
YEARS***

**SENIOR REACTOR
OPERATOR**

- On-the-job training
- Experience in the position

*Compensation averages should be used as a guide. There are numerous factors that impact actual compensation. These estimates do not include over-time, which can be a sizeable addition to base pay. Years of service and training recommendations should also be used as a guide. Company requirements vary.

Note: Some energy companies may require pre-employment testing. Please check the job requirements. These may include the EEI Pre-Employment Test or a Physical Abilities Test.

Become a Nuclear Power Plant Operator

STARTING OFF AS AN OPERATOR IN TRAINING:

What will you do?

- Provide assistance to plant operators by reading gauges, checking equipment
- Make work area safe
- Install and maintain equipment based on manufacturer's specifications
- Read instrumentation schematics to diagnose circuit trouble
- Work toward becoming licensed operator as you advance, train and test in the operations areas

What knowledge/skills/abilities will you need?

- Be able to quickly learn and retain information about the plant and systems
- Ability to work within a team
- Able to lift heavy equipment
- Listen and follow directions
- Be comfortable with heights
- Be able to work in noisy conditions
- Math skills including algebra, trigonometry and geometry
- Come to work on time and prepared
- Physical ability to climb stairs and ladders
- Apply knowledge obtained during training in the work environment
- Work with various types of test equipment, including multi-meters
- Work with various types of tools
- Read and follow detailed procedures
- Document work being done
- Communicate with control room and other departments

REACTOR OPERATOR:

What will you do?

- Ensure generating equipment runs when needed
- Prepare daily reports on operating conditions

What knowledge/skills/abilities will you need?

- Use information to diagnose and solve problems
- Manage multiple tasks at one time
- Understand all plant systems and be able to communicate that in verbal and written form
- Comprehend entire systems and how they function
- Foresee system implications of malfunctions or of own actions
- Anticipate required future conditions in numerous interacting systems

SENIOR REACTOR OPERATOR:

What will you do?

- Prepare and place systems and components in and out of service to support normal and off-normal system operations
- Conduct plant walk-downs and inspections
- Identify plant problems and generate trouble tickets
- Maintain operations logs, reports and records regarding equipment performance
- Take action required to address abnormal occurrences

What knowledge/skills/abilities will you need?

- Knowledge about state and federal regulations, guidelines, controls and procedures to protect the public and plant workers
- Implement and maintain effective planning and operating practices to maximize efficient operation
- Supervise plant operations
- Direct and implement emergency operation procedures and event reporting
- Licensing will be required after training

ENERGY INDUSTRY CAREERS OFFER:

- Excellent salaries
- Opportunities for advancement
- Job growth & stability
- Professional development and training
- Great benefits
